Subject: WHAT IS ALL THE FUSS RE: AL JAZEERA?

To whomever it might concern:

A conflict regarding the airing of World View on Channel 15-3 has been brought to my attention via the Mark Bernier radio program. Since World View is just that - news from around the world - composed of segments from various countries, none of whom have an unexpected bias, why would anyone with a mind and, I might add, a spine object to information, regardless of its sources?

Further: Why would any American, assuming that the Jerry Kenny mentioned as an instigator of the controversy is, in fact, an American, wish to impose censorship? Has he not been informed that our American Constitution protects the rights of Freedom of Speech and Freedom of the Press? He certainly has the right to his opinions, but not the right to muffle others! Does he not realize that the right to use "on" "off" controls are limited to his TV set - not to ours?

May I suggest that Mr. Kenny, and all those who wish to undermine our First Amendment, (peaceably) solve their distress by using their respective on-off TV controls.

"Congress shall make no law..." nor shall Mr. Kenny.

Sincerely,
An Appreciative Viewer
